# **Union City Family Center Logic Model**

**OUTPUTS** 

Shared Vision
The Union City
Family Center is a partnership of families, schools, community, & public & private organizations working together to promote "cradle to retirement"

success. Our Mission: We build community by engaging and supporting youth, adults, and local agencies to develop the educational, health, and social frameworks, that provide every child, family, and community with access to the services and opportunities needed to thrive.

#### **Priorities**

Utilize the theory of collective impact to promote success. (https://collectiveimpactforum.org)

Build on strengths and assets of families and community.

Build on and leverage existing resources.

Fully engage and mobilize families and the community in meaningful ways.

Use evidence-based decision making to promote continuous improvements.

Cultural affinity groups including faith-based organizations

Like-partners in other cities and regions

#### **OUTCOMES - IMPACT**

Short term - Medium Term - Long-Term

multiple resources across the region

1000 + students annually from low-income households have increased learning opportunities through pre-school, summer, after school, and daily attendance.

Alignment and

integration of

3000 + individuals annually have access to food, shelter, health services (including vaccinations and preventive care), transportation, & social services.

40 + agencies and 100 + individual members engaged in community and/or leadership Student
attendance and
high school
graduation rates
will increase as
barriers to
attendance and
learning are

learning are removed.

All individuals and families in the Union City area will have access to healthy and nutritious food.

All individuals and families in the Union City area will have access to health care, including preventive and pre-natal care.

Strong regional community-based leaderships emerge to identify and address community issues. Every child has access to high quality early childhood education.

Education
disparities including
trades, community
college and fouryear programs will
decrease.

Health disparities (including pre-natal, emergency care, and morbidity) will decrease.

Food, housing, and economic security (savings) will increase for the community.

Community leaders will emerge to sustain and expand growth including small and regional businesses.

**Assumptions:** Community contributes valuable assets; empowering the community sustains the work; together we are better

**External Factors:** State and regional economy; housing markets, demographic changes, and policy changes

**Evaluation:** Using a results-based inquiry process, we collect multiple forms of data including demographics, services, supports and volunteer, and partner involvement. Analysis includes client outcome data; regional return on investments; community engagement; and alignment of services between organizations and institutions
